PROFESSIONAL SUMMARY

Innovative **Mobile Developer** with hands-on experience in SaaS architecture, Flutter application development, REST API integration, and UI/UX implementation. Skilled in building responsive and user-focused applications, with a strong willingness to learn new technologies and contribute to scalable software solutions.

TECHNICAL SKILLS

- Languages and Frameworks: Dart (Flutter), PHP (Laravel), JavaScript (React), TypeScript (Vue.js), HTML, CSS.
- Tools & LLM: Git, Anthropic, Gemini, GrokAI, OpenAI API.
- Data & Database Management: MySQL, Supabase, MariaDB.
- Tools, Infrastructure & DevOps: Git, GitHub, Bitbucket, Postman, Render, XAMPP, Visual Studio Code.
- Automation & Integration: n8n, REST APIs, Webhooks, API Integration.

PROJECT EXPERIENCE

Front-End Developer - Laravel Blade, PHP, HTML, CSS, JavaScript, Bootstrap, Git, GitHub Aug 2025 - May 2026

Sinking Fund Organizer - Internship Project

- Designed and developed the application's UI/UX, creating clean, responsive, and user-friendly web interfaces.
- Converted UI designs into functional web pages using Laravel Blade, HTML, CSS, JavaScript, and Bootstrap.
- Developed reusable components, forms, tables, navigation, and interactive interface elements.
- Integrated front-end interfaces with backend data and functionality through Laravel Blade and Eloquent.

Front End Developer - Figma, HTML, CSS, JavaScript

Aug 2025 - Dec 2025

Car Reservation Project - Capstone Project

- Designed and implemented the UI/UX and responsive user interfaces using Laravel Blade, HTML, CSS, Bootstrap, and JavaScript.
- Developed and integrated features for car reservations, vehicle listings, user interactions, and reservation management.
- Performed testing, debugging, and UI improvements to ensure functionality, usability, and overall application quality.

WORK EXPERIENCE

Flutter Mobile Developer - Flutter, Dart, Dio, Postman, Riverpod, REST API, JWT Token

April 2026 - Aug 2026

Pro Schedule Mobile Application - Freelance

- Implemented screens and reusable UI components while ensuring consistency in layout, spacing, typography, navigation, and user interactions.
- Integrated and tested REST APIs using Postman to retrieve and manage application data, validate API responses, and support authentication and API-based workflows.
- Worked with JSON data and API documentation to ensure proper communication between the Flutter mobile application and backend services.

Flutter Mobile Developer - Flutter, Dart, Clean Architecture, REST API, GoRouter, Riverpod

Aug 2026 - Current

Dio, Twilio

Serbisyo San Remigio

- Developed a cross-platform mobile app in Flutter and Dart that lets residents of San Remigio, Cebu access municipal services, announcements, events and emergency hotlines in one place.
- Built Clean Architecture with domain, data and presentation layers across 7 feature modules, using Riverpod (with code generation) for state management and GoRouter for navigation.
- Built phone-number sign-in with SMS OTP (one-time code) verification, account registration and service-request tracking. Requests show reference numbers and move through Paid, Processing and Ready stages.

EDUCATION

Bachelor of Science in Information Technology

2022 - 2026

Cebu Technological University - Danao Campus
